

SharePoint 2013

Candidates for the Microsoft SharePoint 2013 exam should have a sound understanding of the SharePoint environment and the ability to perform all site-level tasks. They should know and demonstrate the correct application of the principle site, library, and list features of SharePoint 2013. Candidates should be able to optimize and customize SharePoint sites to provide structure, solve problems, facilitate collaboration, and enhance productivity. Examples of application include managing list permissions, adding content to Quick Launch, creating team sites, and modifying library views. Candidate roles might include technical support staff, project managers, team leads, department heads, and others.
